

Chaitanya Pawaskar

Multidisciplinary Product & Industrial Designer | IIITDM Kancheepuram | Wipro iDesign '25 Awardee

Portfolio • [Linkedin](#) • chaitanyapawaskar27@gmail.com • +91-9326448051 • Mumbai, India

Professional Summary

Industrial designer with an M.Des in Integrated Product Design (IIITDM Kancheepuram) and hands-on internship experience translating ethnographic research and systems thinking into tool-less, modular, manufacturing-ready products. Proficient in 3D modeling, rapid prototyping, and mechanism design within real-world engineering constraint

Core Skills & Competencies

- **Strategic Industrial Design:** Product Architecture, Tool-less Modular Design, Sustainable Material Innovation, Ergonomics & Human Factors, Form Exploration, CMF (Color, Material, Finish)
- **Systems Thinking & Research:** System Mapping, Stakeholder Interdependence Analysis, Ethnographic Field Research, UI/UX Layouts
- **Frameworks & Methods:** Sketching, Universal Design Standards, Rapid Prototyping & Iteration, Bio-centric Design, Mechanism Design, Component Assembly Optimization
- **Tools & Technologies:** Fusion 360, Rhino 7, SolidWorks, KeyShot, Figma, Blender, Adobe Illustrator, Adobe Photoshop, Vizcom (AI)

Key Projects & Case Studies

Universal Travel Adapter *Patent in Progress*

- Designed a single-step twist mechanism enabling hardware-free plug switching, replacing bulky multi-region adapter hardware with one unified, tool-less solution.
- Optimized internal component layout to maximize compactness within the adapter's form factor.

Dual-Zone Smart LED Streetlight

- Developed a dual-lighting housing system delivering independent, glare-free illumination for roadways and pedestrian zones simultaneously.
- Designed dynamic color-temperature and intensity controls, and merged direct/indirect lighting configurations to improve uniformity and reduce glare.

Hybrid-Electric Medical Vehicle

- Engineered an active suspension system to maintain stability during rough, off-road navigation for emergency medical evacuations.
- Designed an adaptive stretcher mechanism to isolate and cushion patients, reducing physical strain on patients and operators during transit.

Systems Thinking – ZP Schools

- Mapped stakeholder inter dependencies across regional school systems, translating operational friction points into structural, data-backed design recommendations for facility improvement.

Design for Special Needs – Osteoarthritis Mobility Aid

- Designed a universally accessible mobility aid for geriatric and osteoarthritis patients, engineered to reduce daily joint strain while meeting international material-safety and universal design standards.

Ethnographic Research – Timber Market Machinery

- Conducted field observations and spatial workflow interviews with sawmill laborers in high-risk work environments to identify safety and efficiency gaps.
- Translated field findings into localized machinery modifications that improved operational safety and workflow efficiency.

Experience

Industrial Design Intern – Wipro Consumer Lighting Jul 2025 – Dec 2025 Pune, India

- Engineered tool-less architecture for outdoor luminaire infrastructure, successfully designing 8+ modular lighting fixture prototypes.
- Reduced maintenance complexity by replacing legacy hardware configurations with intuitive fastening mechanisms and modular components.
- Analyzed system lifecycles and maintenance performance tracking data for 20+ existing outdoor fixtures to systematically identify cost-reduction opportunities.
- Executed 5 complete iterations of high-durability assembly mechanisms, achieving optimized user physical interaction and strict engineering durability standards.

Industrial Design Intern – Carlos Philip Watches Feb 2024 – Jul 2024 Mumbai, India

- Conceptualized 12 innovative watch form concepts, preserving strict premium brand aesthetics, core market positioning, and historical design narratives.
- Generated production-ready digital assets across 3 foundational product lines, aligning physical luxury indicators with modern user demands.
- Enhanced UI/UX parameters for digital touchpoints, mapping clean user interfaces to align seamlessly with physical hardware design updates.

Education

Master of Design (M.Des), Integrated Product Design IIITDM Kancheepuram

- Core focus: structural systems thinking, advanced modular architecture, sustainable infrastructure design.
- Directed cross-functional student groups on project development, contributing to high-impact academic initiatives.

Bachelor of Design (B.Des), Product Design MIT School of Design (MIT AOE)

- Core focus: 3D modeling, ergonomics, kinetic mechanisms, materials & manufacturing processes, UI/UX, ethnographic field research.

Design Awards

Runner Up: Wipro iDesign Challenge 2025 – Awarded for the Kairos Table Lamp design concept, evaluated on aesthetics, manufacturing feasibility, and user interaction mechanics.
